

Thermoplus TH-260D1

The Thermoplus all-in-one Heat Pump Water Heater combines a heat pump water heater and hot water storage cylinder in one sleek unit. Suitable for installation in an outdoor environment.

HOW IT WORKS

The TH-260D1 is an air source heat pump water heater that absorbs heat from the outside environment and transfers it to water, heating it up very efficiently. It is like a fridge working in reverse.

While the unit is powered by electricity, the electrical input does not generate heat but instead, moves the free heat to the water. Heat pump water heaters are incredibly energy efficient compared to other forms of heating. Government agency EECA (Energy Efficiency Conservation Authority) has listed heat pumps as one of the most energy efficient forms of heating in New Zealand.

Power Supply	230V~1/50Hz
kW output	2.9 kW
kW in	660 W
COP* (EN16147)	4.4
Run Amps	3
Refrigerant	R-290
Global Warm Potential (GWP)	3
Back up element	1500 W
Noise level dB(A)	48
Maximum Temperature Setpoint	65 °C
Net weight - kg	98
Dimensions LxWxH - mm	620 x 1809
